The 2-Minute Rule

A short pause at the point of work:

- Before you start
- After a break
- At handover
- After an interruption
- After any change

Two minutes is a guide. A repeat task takes seconds.

STOP Hands off.

LOOK Around the job, and compare it with the plan.

ASK Ask yourself the four questions.

1. **What's different?**
   Anything new, changed, or not as planned?
2. **What could hurt us?**
   Moving parts, power, pressure, heat, sparks, chemicals, low oxygen?
3. **Checked or assumed?**
   Did you look or test it yourself, or are you guessing?
4. **What if it goes wrong?**
   Where does it go? Who is in the way?

DECIDE Make one of three calls. See the back.

DECIDE Make one of three calls.

✓ GO

You found nothing wrong. Start the job.

FIX IT

Only if you're trained and authorized, **and** it's a step in your procedure.

STOP & GET HELP

Hands off. Leave it as it is. Call your lead. No permit yet? Someone else's unfinished work? Not authorized? The fix doesn't work? **When in doubt, get help.**

This rule adds to your procedures, permits and lockout. It never replaces them.
